Rattanakorn Chongruaiklang

สวัสดีค่ะ, I am Gungun, I have just finished Computer Science. I am interested in website development. And I am always ready to learn new knowledge about technology or new framework which I haven't used before. If you want to get more information, contact me.

Experience

Personal Project, 2022

Portfolio
web developer

− This project is a website I created for my profile using react.js to build a website. You can view the work by following this link: gunrtnk

Project in class
data minning

− Project data mining from Data-Driven Decision making for business courses. I used Python for scraping data and analysis data by CRISP-DM process.

web developer

− This is a project of business computing and electronic commerce course. I created a website with basic PHP languages and phpMyAdmin for managing a database.

Final-Year Project, 2021
front-end developer

− The final year project is an inventory management system for The Department of Computer Science. This project is a website that my partner and I created by using react.js and node.js to implement and we use the UI framework is Ant Design for building front end of this project.
