# Rattanakorn Chongruaiklang

Hi, I am Gungun, I have just finished Computer Science.
I am interested in Application development. And I am always ready
to learn  new knowledge about technology or new framework which
I haven't used before. If you want to get more information, contact me.

## Experience

**Personal Project,  2022**

**Portfolio**

*web developer*

– This project is a website I created for my profile using react.js to build a website. You can view the work by following this link: portfolio-gungun.netlify.app

**Project in class**

*data minning*

– Project data mining from Data-Driven Decision making for business courses. I used Python for scraping data and analysis data by CRISP-DM process.

*web developer*

– This is a project of business computing and electronic commerce course. I created a website with basic PHP languages.

**Final-Year Project, 2021**

*front-end developer*

– The final year project is an inventory management system for The Department of Computer Science. This project is a website that my partner and I created by using react.js and node.js to implement and we use the UI framework is Ant Design for building front end of this project.
